BRAIN RESEARCH

VOL. 570 NOS. 1/2 **CONTENTS** **20 JANUARY 1992**

Announcement from the Publisher v

Research Reports

Adaptability of the oxidative capacity of motoneurons
G.R. Chalmers, R.R. Roy and V.R. Edgerton (U.S.A.) 1

Factors in amphetamine-induced contralateral rotation in the unilateral 6-OHDA lesion rat model during the first-week postoperative: implications for neuropathology and neural grafting
R.J. Carey (U.S.A.) 11

Identification of a B-50-like protein in frog brain synaptosomes
U. Janssen, C. Richter-Landsberg, A.B. Oestreicher, P.N.E. De Graaf, W.H. Gispen and H. Flohr (F.R.G., The Netherlands) 21

Aberrant regeneration of motor axons into the pia mater after ventral root neuroma formation
M. Risling, K. Sörbye and S. Cullheim (Sweden) 27

Adenosine inhibition of the regeneration in vitro of adult frog sciatic sensory axons
A. Edström, M. Edbladh and P. Ekström (Sweden) 35

Norepinephrine activates potassium conductance in neurons of the turtle cerebral cortex
K.J. Blanton and A.R. Kriegstein (U.S.A.) 42

Learning impairment following intracerebral administration of the HIV envelope protein gp120 or a VIP antagonist
J.R. Glowa, L.V. Panlilio, D.E. Brenneman, I. Gozes, M. Fridkin and J.M. Hill (U.S.A., Israel) 49

Corticotropin releasing hormone related behavioral and neuroendocrine responses to stress in Lewis and Fischer rats
E.M. Sternberg, J.R. Glowa, M.A. Smith, A.E. Calogero, S.J. Listwak, S. Aksentijevich, G.P. Chrousos, R.L. Wilder and P.W. Gold (U.S.A.) 54

Effects of nerve growth factor on TTX- and capsaicin-sensitivity in adult rat sensory neurons
L.G. Aguayo and G. White (U.S.A.) 61

The interaction of testosterone with the brain of the orchidectomized primate fetus
R.P. Michael, D. Zumpe and R.W. Bonsall (U.S.A.) 68

Alterations of plasma membrane fatty acid composition modify the kinetics of Na^+ current in cultured rat diencephalic neurons
C.C. Park and Z. Ahmed (U.S.A.) 75

Current source density of sustained potential shifts associated with electrographic seizures and with spreading depression in rat hippocampus
W.J. Wadman, A.J.A. Juta, W. Kamphuis and G.G. Somjen (U.S.A.) 85

Projections from the nucleus accumbens to cholinergic neurons of the ventral pallidum: a correlated light and electron microscopic double-immunolabeling study in rat
L. Záborszky and W.E. Cullinan (U.S.A.) 92

GABAergic synaptic current in dissociated nucleus basalis of Meynert neurons of the rat
N. Akaike, N. Harata, S. Ueno and N. Tateishi (Japan) 102

Differential influence of local anesthetic upon two models of experimentally induced peripheral mononeuropathy in the rat
P.M. Dougherty, C.J. Garrison and S.M. Carlton (U.S.A.) 109

The role of laminin, a component of Schwann cell basal lamina, in rat sciatic nerve regeneration within antiserum-treated nerve grafts
G.-Y. Wang, K.-I. Hirai and H. Shimada (Japan) 116

Time course of nigrostriatal system changes after tract hemisection and effects of ganglioside treatment: a multiple retrograde fluorescent tracing study
M. Molinari, A. Consolazione, A. Leon and M. Bentivoglio (Italy) 126

Regional glucose metabolic changes after learning a complex visuospatial/motor task: a positron emission tomographic study
R.J. Haier, B.V. Siegel Jr., A. MacLachlan, E. Soderling, S. Lottenberg and M.S. Buchsbaum (U.S.A.) 134

The role of GTP binding proteins in ischemic brain damage: autoradiographic and histopathological study
H. Aoki, H. Onodera, Y. Yamasaki, T. Yae, Z. Jian and K. Kogure (Japan, China) 144

Selective localization of C atrial natriuretic peptide receptors in the rat brain
S. Zorad, K. Tsutsumi and J.M. Saavedra (U.S.A.) 149

Indole-*N*-methylated β-carbolinium ions as potential brain-bioactivated neurotoxins*
M.A. Collins, E.J. Neafsey, K. Matsubara, R.J. Cobuzzi Jr. and H. Rollema (U.S.A., Netherlands) 154

The occurrence of three isoenzymes of protein kinase C (α, β and γ) in retinas of different species
N.N. Osborne, N.L. Barnett, N.J. Morris and F.L. Huang (U.K.) 161

Autoradiographic analysis of [^{35}S]TBPS binding in entorhinal cortex-kindled rat brains
J.S. Petrasek, J.N. Nobrega, S.J. Kish and W. McIntyre Burnham (Canada) 167

Monoamine-mediated enhancement of acetylcholine release in rat hippocampus by 6*R*-L-erythro-5,6,7,8-tetrahydrobiopterin
T. Ohue, K. Koshimura, Y. Akiyama, Y. Watanabe and S. Miwa (Japan) 173

Actions of endothelin at the subfornical organ
K.M. Wall, M. Nasr and A.V. Ferguson (Canada) 180

Medial septal modulation of entorhinal single unit activity in anesthetized and freely moving rats
S.J.Y. Mizumori, K.E Ward and A.M. Lavoie (U.S.A.) 188

(*contents continued on p. 360*)

Cited in Biological Abstracts (BIOSIS) — Chem. Abstracts — Index Medicus (MEDLINE) — Current Contents (Life Sci.) — Excerpta Medica (EMBASE) — Psychological Abstracts (PsycINFO) — Pascal et Francis (INIST-CNRS) — RIS (Reference Update)

Pure Schwann cell suspension grafts promote regeneration of the lesioned septo-hippocampal cholinergic pathway
C.N. Montero-Menei, A. Pouplard-Barthelaix, M. Gumpel and A. Baron-Van Evercooren (France) 198
GFAP expression of human Schwann cells in tissue culture
D. Bianchini, I. De Martini, A. Cadoni, A. Zicca, M. Tabaton, A. Schenone, S. Anfosso, A.S. Akkad Wattar, D. Zaccheo and G.L. Mancardi (Italy) 209
Mechanism of delayed intracranial hypertension after cerebroventricular infusions in conscious rats
B.A. Morrow, M.R. Holt, V.P. Starcevic, L.C. Keil and W.B. Severs (U.S.A.) 218
Glucose enhances recovery of potassium ion homeostasis and synaptic excitability after anoxia in hippocampal slices
E.L. Roberts Jr. and T.J. Sick (U.S.A.) 225
Involvement of cyclic guanosine monophosphosphate (cGMP) and cytosolic guanylate cyclase in the regulation of synaptic ribbon numbers in rat pineal gland
R. Spessert, B.B.P. Gupta, A. Seidel, S.K. Maitra and L. Vollrath (F.R.G.) 231
Relationship of neurologic status in macaques infected with the simian immunodeficiency virus to cerebrospinal fluid quinolinic acid and kynurenic acid
M.P. Heyes, E.K. Jordan, K. Lee, K. Saito, J.A. Frank, P.J. Snoy, S.P. Markey and M./Gravell (U.S.A.) 237
Characterization of the norepinephrine uptake system and the role of norepinephrine in the expression of the adrenergic phenotype by quail neural crest cells in clonal culture
J.-M. Zhang and M. Sieber-Blum (U.S.A.) 251
Difference in distribution of glutamate-immunoreactive neurons projecting in to the subretrofacial nucleus in the rostral ventrolateral medulla of SHR and WKY: a double-labeling study
K. Takayama and M. Miura (Japan) 259
Cellular correlates of classical conditioning in identified light responsive pedal neurons of *Hermissenda crassicornis*
T.M. Hodgson and T. Crow (U.S.A.) 267
Neuropeptides in the human superior cervical ganglion
J. Baffi, T. Görcs, F. Slowik, M. Horváth, N. Lekka, E. Pásztor and M. Palkovits (Hungary) 272
Electrically evoked turning: asymmetric and symmetric collision between anteromedial cortex and striatum
J.S. Yeomans and K.E. Buckenham (Canada) 279
DSP-4, a noradrenergic neurotoxin, produces more severe biochemical and functional deficits in aged than young rats
P. Riekkinen Jr., M. Riekkinen, A. Valjakka, P. Riekkinen and J. Sirviö (Finland) 293
Passive electrical properties of motoneurons in aged cats following axotomy
J. Yamuy, J.K. Engelhardt, F.R. Morales and M.H. Chase (U.S.A.) 300
Electrical states in the rabbit brain can be altered by light and electromagnetic fields
G. Bell, A. Marino, A. Chesson and F. Struve (U.S.A.) 307
Activation of nerve growth factor synthesis in primary glial cells by phorbol 12-myristate 13-acetate: role of protein kinase C
I. Neveu, F. Jehan, R. Houlgatte, D. Wion and P. Brachet (France) 316
Intracellular HRP study of nociceptive neurons within the ventrobasal complex of the cat thalamus
T. Nomura, N. Nishikawa and T. Yokota (Japan) 323
Chronic lithium administration alters a prominent PKC substrate in rat hippocampus
R.H. Lenox, D.G. Watson, J. Patel and J. Ellis (U.S.A.) 333
Characterization of prolactin receptor in human brain and choroid plexus
R. Di Carlo, G. Muccioli, M. Papotti and G. Bussolati (Italy) 341

Short Communications

NMDA-induced increase in $[Ca^{2+}]_i$ and $^{45}Ca^{2+}$ uptake in acutely dissociated brain cells derived from adult rats
M. Villalba, A. Martínez-Serrano, C. Börner, P. Blanco and J. Satrústegui (Spain) 347
Decreased [^{3}H]hemicholinium binding to high-affinity choline uptake sites in aged rat brain
G. Forloni and N. Angeretti (Italy) 354
